

Environmental Law

Mansour Gavin offers sophisticated environmental law and regulatory compliance counsel, built on extensive experience. We regularly advise clients on adhering to state and federal laws, such as the Federal Clean Air Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act, the Superfund Amendments and Reauthorization Act of 1986.

In addition, our attorneys help clients navigate various regulatory areas that are enforced by the United States Environmental Protection Agency, the Ohio Environmental Protection Agency, and the Ohio Department of Commerce. These areas include regulations concerning underground storage tanks, wetlands, hazardous waste spills, compliance issues affecting underground water, sanitary sewage issues, storm water management, air quality and the disposal of waste materials.

Our attorneys represent many domestic and international companies in complex federal and state personal injury and property damage toxic tort litigation, including asbestos and silica claims, both within and outside Ohio. We also counsel clients on international regulations, including Europe's WEEE and RoHS standards.

We guide clients seeking regulatory approval of practical, flexible permits to install (PTI) and permits to operate (PTO) applications.
