Environmental Law

Mansour Gavin provides comprehensive legal counsel on environmental law, and environmental litigation. Our attorneys advise clients on navigating complex state and federal environmental laws and litigations, including the Clean Air Act, the Resource Conservation and Recovery Act (RCRA), the Emergency Planning and Community Right-to-Know Act (EPCRA), and the Superfund Amendments and Reauthorization Act (SARA).

We counsel clients on regulatory requirements administered by the U.S. Environmental Protection Agency (EPA), the Ohio Environmental Protection Agency (Ohio EPA), and the Ohio Department of Commerce. Our experience spans a broad range of environmental matters, including underground storage tanks, wetlands, hazardous waste management, groundwater protection, sanitary sewage, stormwater management, air quality, and waste disposal.

Our attorneys also represent many domestic and international companies in complex federal and state litigation involving personal injury, property damage, and toxic tort claims, including asbestos and silica exposure. In addition, we advise on international environmental regulations, including the European Union’s Waste Electrical and Electronic Equipment (WEEE) Directive and Restriction of Hazardous Substances (RoHS) standards.

For clients seeking regulatory approvals, we provide practical, strategic guidance in preparing and obtaining environmental permits, including Permits to Install (PTI) and Permits to Operate (PTO).

We work to develop solutions tailored to each client’s operations, regulatory obligations, and business objectives.
