

## Environmental Law

Mansour Gavin delivers comprehensive legal guidance in environmental law and regulatory compliance, drawing from extensive expertise. Our team advises clients on adhering to both state and federal regulations, including key statutes such as the Federal Clean Air Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act, and the Superfund Amendments and Reauthorization Act of 1986.

Furthermore, we assist clients in navigating various regulatory areas enforced by entities such as the United States Environmental Protection Agency (EPA), the Ohio Environmental Protection Agency, and the Ohio Department of Commerce. These encompass regulations pertaining to underground storage tanks, wetlands, hazardous waste management, underground water compliance, sanitary sewage issues, stormwater management, air quality, and waste material disposal.

Our attorneys represent many domestic and international companies in complex federal and state litigations involving personal injury and property damage and toxic tort claims, including those related to asbestos and silica. Moreover, we offer strategic counsel on international regulatory frameworks, including Europe's Electrical and Electronic Equipment (WEEE) and Restriction of Hazardous Substances (RoHS) standards.

For clients seeking regulatory approval, we provide guidance in crafting practical and adaptable permit applications, including Permits to Install (PTI) and Permits to Operate (PTO), tailored to meet their specific needs.
